MAXIMUM COMFORT AND CONTROL IN HEATING

March 2006

Enerjoy Radiant Heat Awarded in 2006 RPA Showcase

SSHHC, Inc, manufacturer of Enerjoy Radiant Heat systems, was awarded a 2006 System Showcase award by the Radiant Panel Association at September's annual conference in Chicago.

ENERJOY electric radiant panels were used to retrofit a 120 unit , 45,000 square foot building in New York City. The building, owned by Diane Fink Management, converted to ENERJOY radiant heat from a steam heating system.

According to Richard Watson, President of SSHHC, Inc., "A study spearheaded by the U.S. Dept. of Energy and NAHB recognized ENERJOY radiant heat as being more efficient than other forms of heat...gas, oil or other electric systems. Recognition of that fact is growing."

Ceiling-mounted ENERJOY panels are used for residential, industrial and commercial installations.
